Zoni y zapatillas Gola.

## ATTRACTIVE MEN

*Jon Kortajarena, Miguel Ángel Muñoz, Iván Sánchez, Aitor Ocio and Javier de Miguel.*

[...] has spoken a little bit about how disturbing male beauty can be for the majority of women. Teenage girls are excused from expressing with screams, with exaggerations, with their whole body their attraction for their young [...] or for the young men to which they are attracted. For many centuries, a good-looking man has been something annoying [...] a virtue that was only permitted to women, and hence some considered that a good-looking man could not be taken seriously.

Women, on the other hand, felt that their own territory was being invaded. How to seduce an attractive man, when female beauty [...] in the art of conquest? A man who is authentically good-looking is a miracle. A repeated miracle, moreover, because just as the canons that judge female beauty have varied enormously, the men that the Greeks, the men of the Renaissance, and the Romantics considered beautiful are the twin brothers of our contemporary good-looking men. The straight nose, squared jaw, the [ ] eyes often of a light color, the proportion between the chin and the mouth create an immediate, almost irresistible fascination. Like catharsis in the theater or the suspension of time in front of an immortal painting, physical beauty deprives us of words. They are not necessary. It is enough to admire it and enjoy it.

Perhaps for this reason beauty is associated with lack of intelligence. Nothing could be less accurate! It is not the candle's fault that it attracts moths. It is the moths that cry when the candle that they cannot reach sings them.
